Summary

Software Engineer with 3+ years of experience building and delivering scalable web and mobile applications across frontend and backend systems. Strong expertise in React, React Native, TypeScript, Flutter, Java, and Spring Boot, with experience developing real-time applications, REST APIs, authentication workflows, subscription systems, and cloud-hosted solutions. Proven ability to own features end-to-end from design and development through deployment and production support

Technical Skills

Languages: TypeScript, JavaScript, Java, Python, Swift, C, C++

Frontend: React, React Native, Flutter, Next.js, Vue.js, Tailwind CSS

Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication

Databases: MySQL, Postgres, MongoDB, Firebase

DevOps & Tooling: Git, Docker, GitHub Actions, CI/CD Pipelines, Rancher, Postman

Other: WebSockets, Real-Time Systems, API Integration, Agile Development

Experience

Software Engineer, ThinkSwift May 2025 – Present | Toronto, Canada

- Develop and maintain web and mobile applications using React, React Native, Flutter, TypeScript, Java, and Spring Boot.
- Design scalable frontend architectures and reusable UI components that improve maintainability, consistency, and user experience across platforms.
- Build backend services, REST APIs, authentication workflows, and business logic supporting customer-facing applications.
- Deliver end-to-end features across frontend, backend, and database layers while ensuring reliability, scalability, and performance.
- Implement real-time communication, notification, subscription, and account-management functionality for web and mobile products.
- Collaborate with stakeholders to translate business requirements into production-ready technical solutions.
- Optimize application performance, troubleshoot production issues, and improve overall system reliability.
- Contribute to CI/CD pipelines, deployment workflows, and cloud-hosted environments using Docker, GitHub Actions, and Rancher.

Software Developer Intern, Zodiac Group Jan 2025 – Apr 2025 | Toronto, Canada

- Developed responsive web interfaces and application workflows using Vue.js and modern frontend practices.
- Built secure API integrations and auth mechanisms supporting real-time communication and notification systems.
- Implemented messaging and notification functionality using WebSockets and event-driven architectures.
- Collaborated with frontend and backend teams to improve application performance, usability, and reliability.
- Participated in Agile development processes including sprint planning, testing, debugging, documentation, and code reviews.

Software Engineer, Freelance Sep 2021 – Aug 2023 | India (Remote)

- Delivered full-stack web applications for small businesses and individual clients using React, Node.js, Firebase, and modern web technologies.
- Built responsive and accessible user interfaces while integrating third-party services, payment systems, and APIs.
- Developed RESTful APIs and backend functionality supporting business workflows and dynamic application features.
- Managed projects from requirements gathering and technical design through deployment and post-release support.
- Collaborated directly with clients to gather requirements, prioritize features, and deliver solutions aligned with business goals.

Education

Graduate Certificate, Information Technology Solutions, Humber College Sep 2023 – Apr 2025 | Toronto, Canada

- Dean's Honor List (All Semesters)

Bachelors, Computer Science & Engineering, Aug 2017 – Aug 2021 | Hyderabad, India
Jawaharlal Nehru Technological University
